## Lande launches her new furniture at Design District 2019

**Schijndel, June 2019 - At Design District 2019, Lande is launching the flexible kitchen system Zok, the bar stool Spinner High and the Dock counter table. These 3 new models in striking colors and designs, will be shown to the public for the first time from 5 to 7 June. The Lande stand V80 is located in the Tearoom of the Van Nelle Fabriek (stand V80) in Rotterdam.**

### Zok

Zok is a freestanding, modular kitchen. Zok consists of a sturdy, robust table which can be expanded with drawers and various built-in appliances. With its modular extensions, Zok can be placed separately in the room. The design is by the design duo Heleen van Heel and Stefan de Bever. Van Heel: "The idea was to create a freestanding kitchen that would also be easy to relocate in its entirety. This gives a lot of freedom for a specific layout of the interior and is easily adaptable. Moreover, Zok adds identity to an interior through idiosyncratic use of color and materials. Tough and robust or do you opt for elegant and playful. Zok is like a chameleon that adapts to the environment. "

### Spinner High

Spinner High is an industrially designed bar stool. This height-adjustable, industrial bar stool is the latest design from up-and-coming design talent Nic Roex. Roex has not opted for a standard tubular frame for the base of the Spinner High. The base of the bar stool consists of metal strips that are cut with a laser. Nic Roex: "Thinking from 1 technology gives you frameworks. That is why I used a different basis for this design than I did for the little Spinner. The solutions to achieve this had to come from technology. And it worked. The Spinner High is built from modern production technology: laser cutting. All parts are laser-cut, which means that all parts fit together precisely." The frame can be powder-coated in various colors, so that the Spinner High sticks to any interior.

## Dock counter table

The Dock counter table is a stylish 90 cm high wooden table with a steel frame that extends above the table. Multiple lamps or hanging plants can be attached to the frame. You can sit on the Dock counter table on height-adjustable bar stools. The Dock counter table is the high variant of the Dock table. Ideal in a commercial building or public space where no lamps can or may be attached to the ceiling. Or in a high industrial space where the lighting is not sufficient.

## Flatlands

Flatlands is a unique modular sofa system that embraces the open architecture of contemporary companies, buildings and spaces. The Flatlands is a clean design with clear and clean lines that are not only come back in the wooden base and in the square seat cushions and optional back cushions. A special detail is the invisible attachment of these back cushions, which makes them almost seem to float. Design duo Daphna Laurens: "By keeping the Flatlands literally 'flat', we have designed a modular sofa system that does not block sightlines in a room. Not even with the back cushions."

## Pico

Pico is an elegant chair with numerous design features, designed by the French designer Patrick Norguet. "Pico was born out of a need, that of a discreet chair, which above all exudes elegance," says Norguet. You won't get bored with the Pico design chair. Every time you discover one of the subtle design features. The striking metal design button on the side, which emphasizes the connection of the back and seat. The frivolous triangular armrests. The characteristic back that runs behind the seat. In addition, the Pico distinguishes itself with a comfortable seat.

## Petram

Petram is a modular cabinet system that combines storage space with an interactive seating area. Various elements can be combined to create a multifunctional room divider. A room divider with, if desired, an interactive seating area, various open or closed cabinets and space for plants. "The use of space is optimized and communication on the office floor is stimulated," said the Austrian designers of 13&9 Design. "The structures of the Petram are reminiscent of steep rocks. The Petram roomdivider is designed with high and low surfaces and backrests in such a way that they fit in nicely with the furniture landscape."

## Rondo Divano

The Rondo Divano is a comfortable acoustic waiting or consultation couch. The Divano is part of the completely renewed Rondo collection that is now completely modular. All Rondo concentration units can now easily be expanded or switched. The Rondo Divano is available as a 2 or 3 person acoustic upholstered sofa. To consult in peace in, for example, an open office space. Easily create a consultation corner with two Divano's facing each other.

## **Tearoom of the Van Nelle Factory**

Lande presents her furniture during Design District 2019 in the Tearoom of the Van Nelle Fabriek. This unique stand (V80) can be reached via a lift or stairs. In addition to a delicious drink and our furniture, you will find plenty of information about the architectural highlights of Rotterdam on our stand. Moreover, at Design District we work together with Interstuhl, which will also show their latest models. In addition, Interface will show various floors on our stand and the stand will be decorated with various Feltplants by Wandschappen.

## **About Lande**

Lande designs and produces furniture for modern work environments and meeting places that stimulate creativity and productivity. Lande has a wide collection of furniture for various spaces such as concentration of workplaces, a brainstorming room or a modern boardroom. The entire process from development to delivery to the end user is carried out in-house.

Lande is part of Lande Group from Schijndel. Lande Group is a family business in the furniture industry. Lande Group designs, produces and sells furniture for four strong brands: Artifort, Lande, Pörtner and Zwaardvis.
