## Flexibility - Modularity - Diversity

**TRIGON**, a revolutionary table and desk system, is designed to fulfill modern workday life's needs by optimizing the workplace with flexible furniture for work, play and collaboration. Taking cues from a corporate, communicative and individual friendly working environment, **TRIGON** is produced to create both sheltered workspaces and settings for meetings and conferencing.

Adhering to the concept of "breaking the right angle", **TRIGON**'s pragmatic and modular features are developed by the implementation 60° edges onto rectangular systems thus offering the communicative qualities of a round table. In addition to classical rectangular table layouts and row formations, the most innovative aspects of **TRIGON** are exemplified with individual table settings that enable the user numerous different layouts in an open space.

The modular table components can be combined with special features like sound absorbing dividers, shelves and shelters offering a more private workspace. **TRIGON** is available in a variety of design possibilities, surfaces and colors.

**TRIGON** allows for higher space efficiency, especially in buildings with non-rectangular footprints and is a clear solution for activity based and collaborative offices. In aim to support the era of "NEW WORK" which identifies ideal working environments by developing a unique harmony between human beings, space and technology, **TRIGON** represents a highly functional, personalized and versatile office system.

## Space Efficiency

**TRIGON** offers more working space than traditional rectangular desks, with the same floor space. By using **TRIGON** hexagonal and triangular desks up to 15% more working space can be created. By adding **TRIGON** storage solutions on and under the desks even more office space can be saved.

## About 13&9

TRIGON is designed by **13&9**, an interdisciplinary product design firm from Graz, Austria, founded in 2013 by architect Martin Lesjak, CEO of INNOCAD Architecture, and designer Anastasia Su. The creative community at **13&9** is both a design studio for international companies and its own label which produces and sells their own products.

In 2015, Martin Lesjak was honored by Contract Magazine USA as Designer of the Year for his consistent quality and innovative architecture and design work. In addition to this award, **13&9** has been recognized recently with multiple awards for its product collections, including the Best of Neocon Gold Award 2015 and Red Dot Award 2015.

# Elements & Configurations

**TRIGON** is based on elements with 60°, 90° and 120° edges. By combining these elements, an infinite number of configurations can be created with solutions for each type of work.

## open places

Most modern offices are characterized by open work places. The **TRIGON** workplace system offers completely new possibilities for the design of the **open places**. The workplaces can be arranged flexibly in free geometric shapes, according to temporary team structures.

## me places

**Me places** are workplaces where one can retreat and focus without distraction of others. **TRIGON** provides shelters with acoustic inner walls to work in peace. These shelters can also be used as phonebooths.

# we places

**We places** are places of encounter, of exchange and of formal and informal communication. With **TRIGON** it is possible to create divers configurations for meeting and conferencing.

## Options

Cushion

Power and data socket

Flower pot
